

Pranav Honmode

Frontend Engineer

+971 0504254895 / +971 0504600572 | pranavhonmode123@gmail.com | [LinkedIn](#) | Abu Dhabi, UAE

Professional Summary

Frontend Engineer with 5+ years of experience designing and building responsive, high-performance web applications using React.js, Next.js, TypeScript, and modern JavaScript (ES6+). Skilled at translating UI/UX designs into clean, maintainable, cross-browser and mobile-first interfaces, and integrating them with RESTful APIs and asynchronous data sources. Strong background in performance optimisation (code splitting, lazy loading, SSR/ISR), component-driven architecture, and accessibility (WCAG 2.1). Comfortable working closely with product, design, and backend teams in Agile sprints, and experienced building AI-driven, data-heavy dashboards and real-time interfaces. Proficient in AI-augmented development workflows (Claude, GitHub Copilot) to accelerate delivery and raise code quality.

Work Experience

Senior Frontend Developer

Apr 2021 – Present

Mindnerves Technology Services Pvt. Ltd

Remote

- Designed and developed scalable, high-performance web applications with React.js, Next.js, TypeScript, and modern JavaScript, using SSR/ISR to improve load speed and SEO across enterprise-grade products.
- Translated UI/UX designs into clean, maintainable, responsive, mobile-first interfaces, ensuring cross-browser compatibility for 100,000+ users.
- Integrated frontend applications with RESTful APIs and asynchronous data sources, including WebSocket and Server-Sent Events for real-time, data-heavy dashboards.
- Implemented secure API integration with JWT authentication, OAuth2, token refresh logic, and robust error handling.
- Built scalable, reusable component libraries with Tailwind CSS, SASS, PostCSS, and shadcn/ui, improving consistency and development velocity across teams.
- Improved frontend performance by 30% through strategic Webpack bundling, code splitting, lazy loading, and rendering optimisation.
- Managed application state with Redux Toolkit and React Query for efficient data fetching, caching, and synchronisation.
- Ensured WCAG 2.1 accessibility compliance (ARIA roles, keyboard navigation, colour contrast) and used Sentry for proactive production monitoring.
- Collaborated daily with product designers, product managers, and backend engineers in Agile/Scrum sprints, participating in code reviews and contributing to frontend best practices.
- Used AI tools (Claude, GitHub Copilot, Windsurf-AI) to accelerate development, automate boilerplate, and cut development time by up to 40%.

React Native Developer

Dec 2019 – Jul 2020

Mobigic Technologies

India

- Built cross-platform mobile applications with React Native, integrating REST APIs, offline support, and local data persistence.
- Implemented secure authentication flows with token storage and session management for iOS and Android.
- Improved app performance by reducing bundle size and optimising rendering and navigation.

Key Projects

Assessforce – Multi-Tenant SaaS Platform

2025 – Present

React.js, TypeScript, Redux Toolkit, Material-UI, i18n, charts.js, Nivo Charts

- Led end-to-end development of a responsive, accessible multi-tenant eForms platform with role-based access control and JWT-secured REST API integration.
- Built a WCAG 2.1-compliant, reusable component library with multi-locale i18n support, cutting repetitive code and speeding up client onboarding.
- Optimised form rendering and validation with Ant Design and custom Redux Toolkit hooks, reducing re-renders and time-to-implement for new templates.
- Applied AI-augmented workflows (Claude, GitHub Copilot) for architecture planning, component design, and documentation.

Suzlon Enterprise Solutions – Enterprise Dashboards

2023 – 2024

Next.js, React, TypeScript, Redux Toolkit, Tailwind CSS, Node.js

- Built enterprise dashboards with Next.js SSR for improved performance and SEO, managing complex state across large, multi-module applications.
- Integrated backend REST APIs with authentication flows and caching, shipping features collaboratively with QA and design in Agile sprints.

NS Marketing Intelligence Dashboard

2022

Next.js, Redux, Tailwind CSS, JavaScript, Recharts

- Built real-time, data-heavy analytics dashboards with optimised visualisation components, improving user efficiency by 40%.
- Implemented WebSocket-driven live data feeds with advanced filtering, sorting, and export functionality.

BLACK BOX – E-Commerce Platform

2021

React.js, Redux Toolkit, TypeScript, Tailwind CSS

- Built a full e-commerce platform (PLP, PDP, cart, checkout, payment gateway) with robust form validation and responsive design.
- Reduced cart abandonment by 25% through UX and performance improvements.

Education

Master of Computer Science (MCS)

2021 – 2023

Pune University, India

87.25%

Bachelor of Computer Science (BCS)

2016 – 2019

Pune University, India

69.25%

Additional Skills

Languages (Spoken)

English – Fluent, Hindi – Native, Marathi – Native

IT Skills

- **Languages & Frameworks:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3
- **UI & Styling:** Tailwind CSS, SASS/LESS, PostCSS, shadcn/ui, Material-UI, Ant Design, Bootstrap
- **APIs & Data:** RESTful APIs, WebSocket, Server-Sent Events (SSE), Asynchronous Data Handling, AJAX
- **State Management:** Redux Toolkit (RTK), React Query, Context API, Custom Hooks
- **Performance & Quality:** SSR/ISR, Code Splitting, Lazy Loading, Web Vitals, Cross-Browser & Mobile-First Design, Sentry
- **Tooling & Workflow:** Git, Webpack, Vite, NPM, Agile/Scrum, CI/CD, Code Reviews
- **AI-Augmented Development:** Claude (Anthropic), GitHub Copilot, OpenAI Codex, Claude Code – for architecture planning, refactoring, component scaffolding, rapid prototyping
- **Backend (Plus):** Node.js, Express.js, MySQL
